

ENERGY POLICY

“We are committed to sustainable energy performance management by protecting our assets, values and continuous improvement policy in line with our strategic direction”

- We are committed to setting policy-compliant goals by our management with the participation of our employees, taking actions to achieve these goals, and providing the necessary resources,
- to meeting legal and other requirements regarding energy performance,
- to establishing effective communication with all stakeholders in order to create shared value and beneficial results on Energy Management related issues,
- to using appropriate resources and technologies to keep energy under control,
- to raising business-specific energy performance values in all processes,
- to increasing the share of renewable energy sources in energy use,
- to continuously improving in energy use, energy consumption and energy efficiency, to follow their implementation and results,
- to using products that affect energy performance, purchasing services and providing or supplying related design studies,
- to continuously improving, documenting, announcing, reviewing and updating our Energy Performance and Energy Management System,
- to carrying out activities that increase the awareness of all our employees on energy sensitivity,
- to providing all information and resources to our senior management to achieve the goals and objectives within the scope of energy performance.
